

CODE ALERT®

Wander Management Solutions

Wander Management Solutions

Keeping people safe since 1987

A secure environment is crucial to your residents

and their families. If your residents are at the risk of wandering, keep them safe while reducing the risk of elopements, injuries and liability with Code Alert® Wander Management Solutions.

Discreet protection:
Transmitters promote independence

Safe, Secure, and Discreet

Wander management safely monitors residents at risk of elopement with cost-effective transmitters.

- Notifies caregivers of an attempted elopement for faster response time
- Fully supervised system alerts potential issues before an elopement occurs
- Barrier-Free: Promote mobility and a homelike environment.
- Reports improve staff efficiency and quality of care

CodeWatch Preserve Dignity

The wireless transmitter resembles a typical wristwatch and is available in multiple, decorative faces.

- Colorful options help improve adherence and preserve dignity
- Provides protection while maintaining a home like environment
- Tamper-Resistant, Snap-Closure banding available
- Water-Resistant for bathing

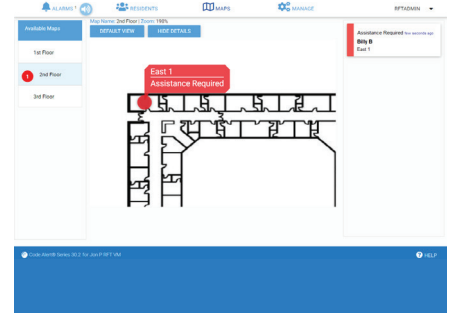

How it Works

Community residents wear transmitters around their wrist or ankle.

- Antennas recognize when a transmitter is near a monitored exit
- System arms the door and instantly notifies caregivers
- Alarm sounds if an attempt is made to open a locked door
- Caregivers are notified if a resident loiters near a monitored exit
- UL 2560 & UL 1069 certification ensures quality, safety and performance for your residents and staff.

“One of the things that we appreciate most about the RF Technologies equipment is its reliability.”

-Randali M. Crobsy, Director of Facilities, Milwaukee Jewish Home and Care Center

Comply with Fire Codes

CodeLock™ mechanisms comply with the National Fire Protection Agency’s safety guidelines for delayed egress.

- Exit points automatically unlock in the event of a fire alarm
- Avoid false alarms: nuisance timer enables one to two seconds of pressure to be applied to a door before alarm sounds

Realize Savings with Analytics

Code Alert software captures and stores alarm and event data that improve overall workflow.

- Near-door event reports identify residents at a higher risk of elopement
- Monitor caregiver performance and response time
- Spot trends to predict future behavior and improve staff efficiency

Improve Response Time

Caregivers can receive alerts at a central computer station or a variety of mobile devices, including LED displays, pagers and walkie-talkies. Add alarm escalation to ensure every call gets a quick response.

Choose the Protection that Fits Your Community

Perimeter Alarm Security

The Model T30 solution provides 24-hour exit monitoring.

- Non-PC-based: alarms when a door is opened
- Bypass alarms using a security code

Transmitter-based Protection

Model T70 and T80 controllers use transmitters and antennas to detect a resident near an exit.

- Transmitters available with various battery lives that add flexibility to your community’s needs
- Elevators deactivate to keep residents safe on their designated floor
- Escort feature enables residents to leave an area for a set time without sounding an alarm

Discreet, Dignified & Restraint-free

The Code Alert® Wander Management Solution conforms to UL Standard 294 for access control systems to ensure continuous, reliable operation.

Control Station

Easy-to-use software is accessible through a touchscreen monitor

CodeLock™

Secures door when a transmitter is detected in a monitored area, then unlocks out of range; nuisance timer helps prevent false alarms

DuoLink Antenna

Mounted near a monitored exit to read radio frequency signals from transmitters; LED blinks when a transmitter is within range

Paging System

Provides instant alarm notification to mobile staff via pagers

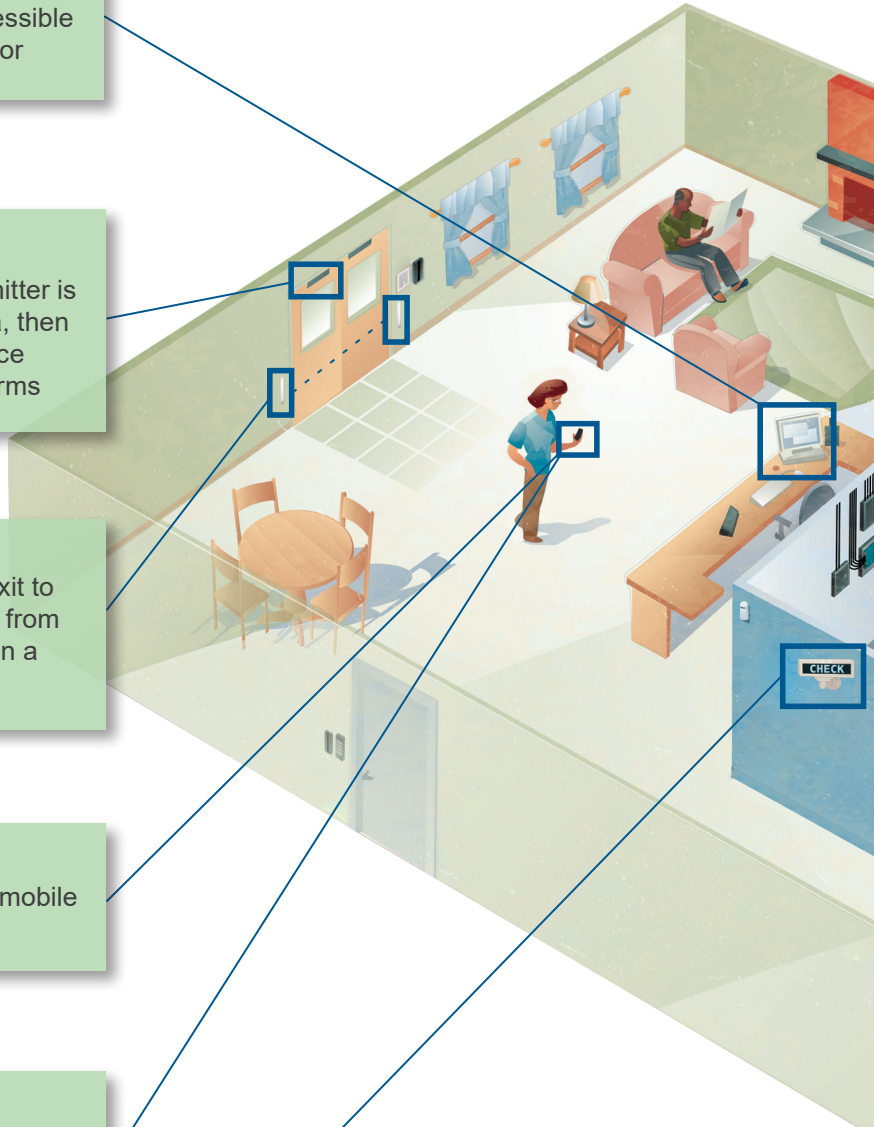

Cell & VoIP Phones

Instant alarm notifications are sent to mobile staff using cell and voice over IP (VoIP) phones

Quick Look™ Display

Discreet LED display shows resident name, location and event type

Touchpad Exit Controller (TEC)

Triggers an exit's lock and used to bypass or silence alarms; LEDs light up touchpad when pressed and turn off when inactive

Proximity Card Reader

Mounted at exit points, staff can easily bypass alarms by swiping key cards or badges

Staff Alert Panel (SAP)

Audible and visual display of an alert, available in 8 or 32 zone models

Auxiliary Keypad

Control entry from the outside of an exit equipped with a TEC; models available for indoor and outdoor use

CodeWatch® Transmitters & Banding

Decorative transmitters are available in a variety of printed designs with multiple colored banding options; transmitters communicate with DuoLink® door antennas

Create a Comprehensive, Integrated Life Safety Solution

The Code Alert Wander Management Solution integrates with our other senior living solutions, helping you save on equipment costs and improve workflow by using the same server and notification devices.

Nurse Call Solutions'

mobile and fixed devices ensure reliable and quick response for residents in need of assistance.

Fall Management Solutions

integrate with Quick Response to send alerts when a resident may have fallen.

Expert, In-House Service

You'll receive a complete suite of support services, from our resident safety experts.

- Nationwide service teams deliver prompt, onsite support for peak performance
- Service agreements minimize unbudgeted expenses
- 24/7 technical support
