

SAFE PLACE[®]

Asset Management

Asset Management

Keeping people safe since 1987

Maximize Asset Value, Prevent Asset Hoarding, Improve Efficiency

Asset management adds quantifiable ROI for hospital systems. It is not enough to know what assets you have, you also need to know where those assets are located.

Efficient Software with Fast Response!

Ensure critical equipment is available. Seeing the availability and maintenance of assets ensures that critical equipment is ready and on-hand.

- View equipment in real time: watch the asset's location continuously update on a floor plan
- Reduce asset hoarding, loss, and shrinkage

Scalable, Cost-Effective, and Low-Impact

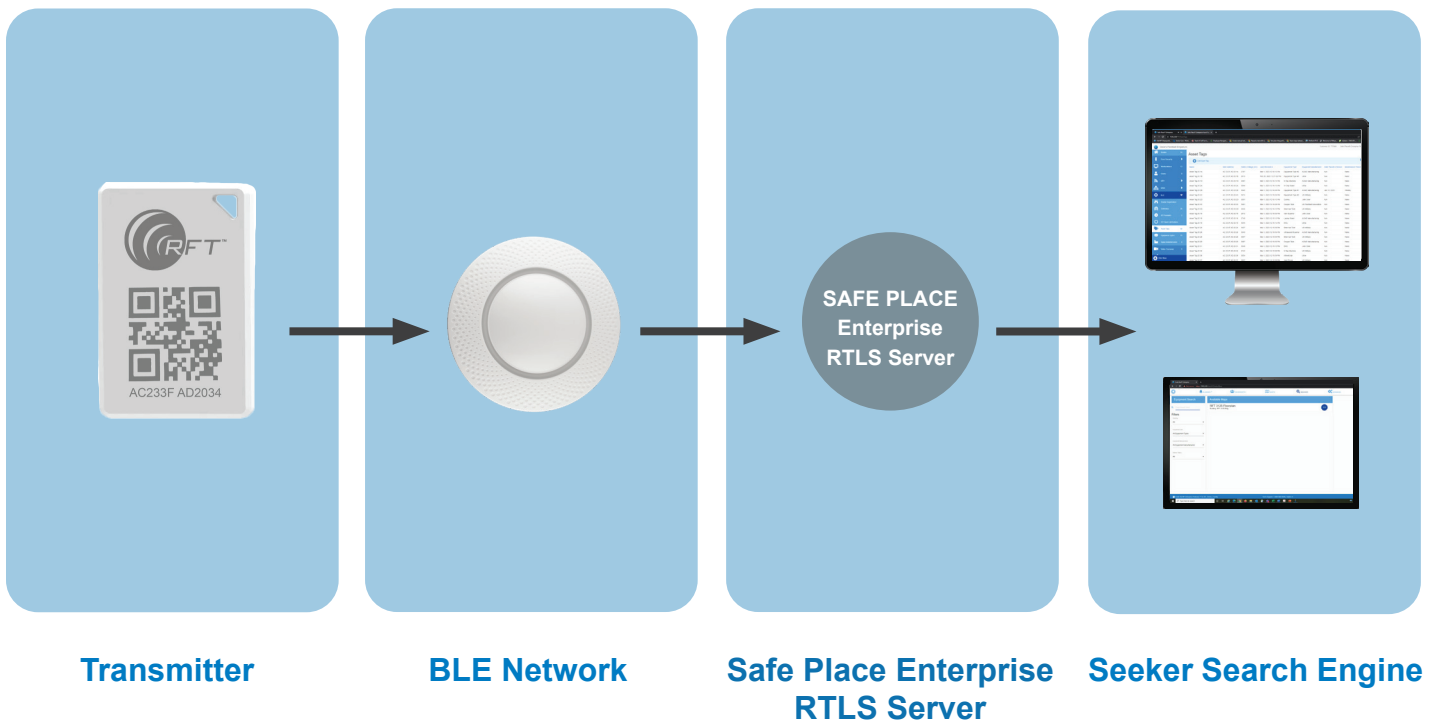

The Safe Place Asset Locating is fully scalable to meet any healthcare facility's needs.

- Tagging equipment is intuitive, the tag can be adhered using double sided tape or a zip tie
- Adding a new asset to the Seeker® Search Engine is easy and is accomplished by simply scanning the QR code
- The Asset Locating tag is low impact. It is the smallest active asset tag on the market

Not Dependent on Facility Wi-Fi

The Safe Place Asset Management system does not require Wi-Fi connectivity to be functional.

- Device locations calculated using cutting-edge BLE 5.0 technology
- Ethernet connection to system server; Wi-Fi capable, but not required
- Scalable: easily expand the system as needed
- PoE or local USB power for gateways

Easily Locate: All tagged equipment is easily located using the Seeker Search Engine. RFT's Enterprise Software allows users to view assets in real-time, or by exporting a list in .CSV or .XLSX.

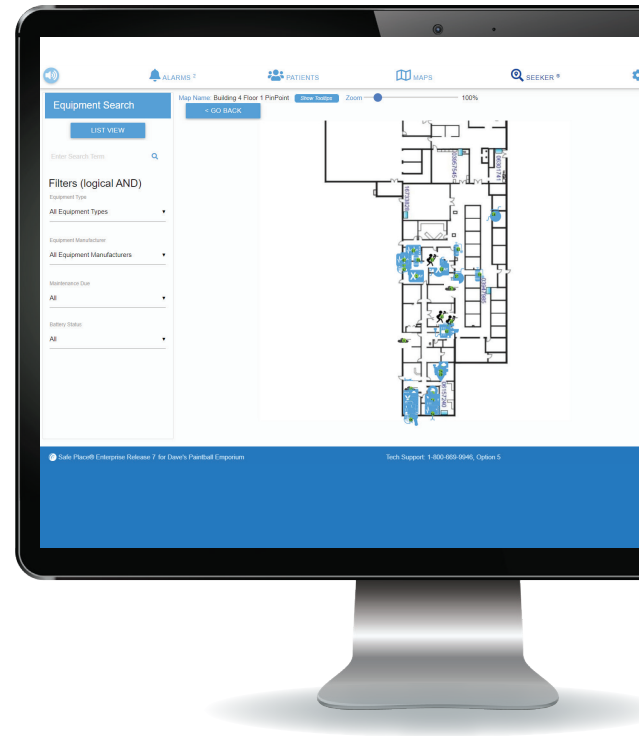

SEEKER® Asset Management Search Engine

Know exactly where your equipment is in your facility.

Ensure Regulatory Compliance

With the Safe Place Asset Management system you can schedule equipment maintenance

- Make sure all assets are properly cared for by placing them on a maintenance schedule.
- Always ensure your facility has the optimal amount of equipment. Know how many assets are in-use and their location at any given time.
- Improve caregiver efficiency with the Seeker Search Engine. It gives staff the ability to export lists to quickly locate and maintain equipment.

Service and Protection Plans

Stay Secure, Long After Your Purchase

Protecting your investment is critical to extending the longevity of your Safe Place system. An effective maintenance program:

- Lowers your total cost of ownership over time
- Optimizes system performance and reliability
- Reduces risk and liability exposure
- Minimizes unexpected repair costs

Customized Services and Support

Protection plans are fully customizable to the needs of your facility. Add any of the services below to your plan for a tailored solution that meets your security, budget and system goals.

- Additional comprehensive inspections, performance, validation, and certification
- Automatic supply replenishment
- Secure remote connection
- On-site user training
- On-site maintenance training

Expert, In-House Service

RF Technologies designs, manufactures, sells and installs its own systems. You can count on a complete suite of in-house services from the leading expert in life and safety solutions.

- Our knowledgeable sales team help you select a solution. Our sales engineers design your system to meet your organization's unique security needs
- Nationwide service teams are certified by RF Technologies to deliver prompt installation and service support
- Customizable service agreements minimize unbudgeted expenses. Annual system check-ups protect your patients
- Software license agreements ensure you have the most recent software version with the latest features and enhancements
- Remote monitoring through a VPN enables timely system support to maximize uptime
- 24/7/365 technical support available
