

New Builds & Remodels

Choose RF Technologies, Inc. (RFT®), for your hospital or senior living new builds & remodels.

RFT partners with architects, contractors, and remodelers to help lay a good foundation for your next hospital or senior living life safety new builds or remodels.

Since 1987, we have partnered with over 11,000 facilities to implement trusted life safety and security solutions. Our solutions protect senior living residents, newborns, pediatrics, and patients in healthcare facilities across the U.S.

Are you looking to upgrade existing safety and security solutions?

RFT helps you every step of the way, from the design phase through final inspections, to ensure your custom safety systems are tailored to your facility.

Expertise: Form & Function Together

RFT's low-profile products blend into communities and facilities with beautiful aesthetics designed to naturally complement modern design practices. This creates the feel of a home-like atmosphere, free of institutional connotations.

Key Advantage: Working with Us

RFT's in-house team of experts has over 35 years of experience working with architects and contractors. We help you analyze the unique safety solution needs for your new construction, retrofit, and remodeling projects.

Dependable: Before & After Support

Dedicated project management is backed by our experience. With our extensive installation expertise, RFT ensures a smooth, non-disruptive implementation. After the installation, you'll have continued support with access to regional installers and service experts.

Trustworthy: Reliable Operation

RFT patient and resident solutions are proven to work, time after time. RFT nurse call systems are certified to the UL-1069 Standard for Hospital Signaling and Nurse Call Equipment and UL-2560 Standard for Emergency Call Systems. Our wander management and infant security systems are certified to the UL-294 Standard for Access Control Systems. This ensures reliable operation and regulatory compliance, for years to come.

New Construction

RFT works with architects and contractors to ensure your safety systems meet the needs of your specific facility.
